

SOLARHOT Pool Heating

Increasing fuel costs are making pool heating more difficult for most residential and commercial pool owners, but energy from the sun is and always will be free.

A SOLARHOT solar pool heating system provides safe, clean energy without burning non-renewable fuels.

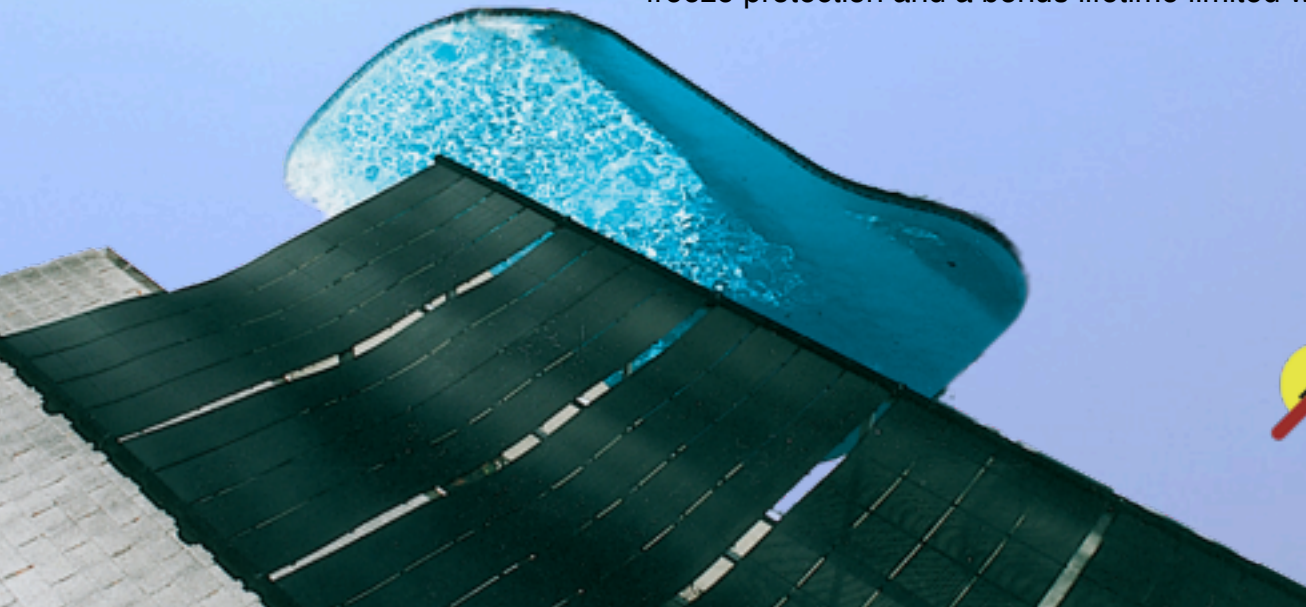

Patented Individual Tube Design™ virtually eliminates wind load and allows your roof to breathe.

Innovative mounting pad installation system requires just 2 roof penetrations per collector, in most cases.

Single piece construction eliminates seams or welds between headers and risers. Maintenance is practically eliminated due to SOLARHOT pool collector's rugged design and reliability.

Our comprehensive warranty allows you to enjoy your pool with confidence that your solar system will perform year after year, worry-free. Full 12 year warranty includes freeze protection and a bonus lifetime limited warranty.
