

# SOLAR INSTALLATION TRAINING

Instructor: Dan Gretsch

Phone: (919) 439-2387

Email: dan.gretsch@solarhot.usa

## HOP ON THE SOLAR TRAIN

SOLARHOT's Solar Heating Installation Training is designed to give you an in-depth look at the design, selection and installation specifics of solar heating systems. Whether you are looking at just water heating for the home or larger commercial scale systems for hotels, you will take away the knowledge you need at this training. As the solar industry continues to gain momentum, now is the time to learn where you will fit in the market.

### About the Instructor:

Dan Gretsch PE MSIE, licensed professional engineer and Vice President of SOLARHOT, has 20 years of engineering, manufacturing and energy management experience. Dan has been published in Home Power magazine and has domestic and international training experience. His designs span residential, commercial and industrial solar water heating and space heating systems.

### Continuing Education Credit:

This course, *Solar Thermal Design and Installation*, is registered for 6 NABCEP Continuing Education Contact Hours (Credits).

### \$299 - One Day Solar Installation Training, includes

- Presentation notes
- Lunch
- One copy of Polysun - Light for simulating and designing solar-heating systems

Location: 2800 Perimeter Park - Suite A - Morrisville, NC 27560

CALL TO RESERVE YOUR SPOT TODAY: 919-439-2387

### What you will learn

- Various solar system designs and their advantages
- Design considerations for system selection
- What pitfalls to avoid
- Available equipment and the advantages of different technologies
- How to do a site analysis
- Economics and incentives
- Software tools to help with system design and analysis
- Installation tips and tricks of the trade
- Solar marketing advantages

### Who should attend

- Installing contractors
- Engineers
- Architects
- Green builders
- Anyone interested in getting into solar energy
